

# SMARTMOVE Filesystem HSM

## Intelligent & Automated HSM Archiving for Tiered Storage

Where has all your precious disk capacity gone ? SmartMove allows you to discover what data you have by Type, Age, Owner etc. SmartMove then allows you to build and implement automated file archiving policies. SmartMove protects archived data and ensures authenticity. SmartMove ends the disk resource tug-of-war between Administrators and Users SmartMove is not in the critical data access path so no DR issues

### Why

- Utilise precious primary disk space efficiently
- Keep data available to users and applications
- Discover and report on storage content
- Remove data from backup cycles—reduce backup times
- Preserve information for regulatory compliance, legal discovery and good governance

### Who

Application, Data or IT Manager

### What

Files/Directories matching organisation retention policies

### When

Regularly (Nightly, Weekly, Monthly) , when appropriate  
Ad Hoc events e.g. Project Checkpoints, Regulatory reasons, Personnel changes

### How

SMARTMOVE + Your Policies + Your Schedules

## Key Benefits

- Makes optimum use of primary storage
- Keep data available to users and applications.
- Implement permanent disk management policies
- Supports Tape, Disk, CAS and Optical
- Reduce Storage TCO and be able to prove it.
- Reduce backup cycle times
- Increase Data Administrator productivity
- Increase End-User productivity
